DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: There appears to be a minor typographical error on line 30, page 2 of the specification. Specifically, the invention relates to "density and/or specific gravity" not "volume and/or specific gravity" of a liquid.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 3. Claims 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention
- 4. Claim 1 recites the limitation "said reference body." There is insufficient antecedent basis for this limitation in the claim. Examiner suggests inserting the term "reference" in between "at least one" and "body" on line 7 of claim 1.
- 5. Claim 1 recites "this latter." There is insufficient antecedent basis for this limitation in the claim. This wording makes the claim confusing. For the purposes of examination it is believed that the reference body is held in

suspension with a suspension member within the enclosure while the enclosure is completely immersed in a liquid.

Allowable Subject Matter

6. Claims 2-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Pertinent Prior Art

- 7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - U.S. Patent 6,561,025 (Ueno) discloses a specific gravity measuring device.
 - U.S Patent 4,770,041 (Bearce) discloses a specific gravity and density measuring device.
 - U.S. Patent 3,589,200 (Nilsson) discloses a density measuring apparatus for a process liquid.

Conclusion

Any inquiry concerning this communication or earlier communications from the
examiner should be directed to Ryan Christensen whose telephone number is
571-272-2683. The examiner can normally be reached on Monday - Friday, 8am
- 5pm.

Application/Control Number: 10/532,304 Page 4

Art Unit: 2856

9. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on 571-272-2208. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
